

## **New-Patient Dialysis Checklist**

Welcome to Hope Renal Centre! To ensure a smooth first visit, please review the checklist below and bring or complete each item before your initial dialysis session.

- National ID or other official identification
- Social Health Authority (SHA) membership details
- Referral documents and recent lab test results (renal profile, CBC, serology, etc.)
- Completed patient intake form (available at reception)
- Orientation session with our care team
- Mandatory triple serology testing (Hepatitis B, Hepatitis C, HIV) at your own cost
- Vascular access evaluation (catheter placement or AV fistula assessment)
- Signed informed consent form
- Disclosure of existing medical conditions and current medications
- Caregiver accompaniment if needed (caregiver lounge available)
- Readiness to receive clean clogs/slippers before entering the dialysis unit
